

Mohamed Wael
Front-End Developer

+20106733 3964 | mohamedwaeltorad@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Cairo, Egypt

Summary

Motivated Front-End Developer with strong expertise in building responsive and high-performance web applications using Angular, React, React Native, JavaScript, HTML, and CSS. Skilled in creating clean, maintainable, and scalable user interfaces with a strong understanding of modern front-end architecture and performance optimization. Passionate about clean code, continuous learning, and collaborating within teams to deliver impactful digital products.

Experience

Front-End Developer Intern — DevWave (6- 2025 : 8-2025)

- Led a team of developers during a React-based internship.
- Built a Full-Stack Amazon Clone using React, Bootstrap, and Firebase, implementing authentication, product management, and cart functionalities.
- Managed workflow using Trello and conducted code reviews to maintain quality and consistency.
- Collaborated to enhance UI/UX and optimize app performance.
- Strengthened leadership and version control experience using Git & GitHub.

Full-Stack Developer Intern — CodVeda (Remote, 9-2025 : 11-2025)

- Developed multiple projects including a Weather App, Data Management System, and a Landing Page using React, Node.js, and Firebase.
- Implemented CRUD operations and responsive design principles.
- Focused on scalable front-end interfaces and clean API integrations.
- Enhanced teamwork, debugging, and problem-solving through collaborative development.

Front-End Developer — Huma-volove (01/2026 – 03/2026)

- Developed responsive and scalable web applications using Next, React, and TypeScript.
- Built reusable UI components and optimized application performance.
- Implemented state management solutions and improved application architecture.
- Integrated RESTful APIs and handled authentication workflows.
- Collaborated with cross-functional teams to deliver high-quality digital products.

Projects

ResumeAI — AI-Powered Resume Builder SaaS

Angular · TypeScript · Firebase (Auth & Firestore) · Tailwind CSS · OpenRouter LLM API · Angular SSR

- integration, and multi-format export in a single production-grade Angular application.
- Integrated AI Assistant across the app: generates professional summaries, job descriptions, project descriptions, and job titles via OpenRouter LLM API with custom prompt engineering.
- Engineered an AI-powered ATS Analyzer that evaluates resume content against job descriptions, scores match rate, and surfaces actionable keyword optimization.
- Implemented a Job Description Matcher that aligns CV content with target roles to maximize ATS pass-through rate.
- Built an AI Mock Interview module with dynamically generated interview questions tailored to the candidate's role
- Delivered 35+ fully customizable CV templates featuring live real-time preview, drag-and-drop section reordering
- Implemented multi-format export pipeline: PDF generation with preserved clickable hyperlinks (html2canvas + jsPDF), and Word document export (.docx via docx.js).
- Integrated Firebase Auth + Firestore:
- Designed bilingual RTL/LTR UI with full Arabic & English
- Implemented a Voice Interview feature for interactive AI-driven interview practice sessions.
- Shipped responsive dark/light mode with glassmorphism design, micro-animations, and mobile-first layout
- Optimized for performance and SEO using Angular SSR , lazy-loaded routes, and code-splitting for all major feature .
- Resume file import: parses uploaded PDF/Word resumes and uses AI chat to automatically populate form fields from the extracted content.

Amazon Clone — Full-Stack E-commerce Web Application

Tech Stack: React.js, Bootstrap, Firebase

- Built a full-featured e-commerce platform inspired by Amazon with authentication, product management, shopping cart, and order tracking.
- Served as Team Leader during the DevWave internship — divided tasks, tracked progress, and conducted code reviews to ensure high-quality standards.
- Managed workflow via Trello for task coordination and timely delivery.
- Integrated Firebase Authentication and Realtime Database for secure and dynamic data management.
- Designed a responsive, user-friendly interface using Bootstrap.

Skills

Front-End: HTML, CSS, JavaScript, React, Redux, Tailwind CSS, Bootstrap, Next.js, TypeScript, Angular

Back-End: Node.js, Express.js, Firebase, MongoDB

Tools: Git, GitHub, Vite, VS Code, Trello, Agile

Soft Skills: Problem-Solving, Team Leadership, Communication, Collaboration

Certifications & Courses

- Responsive Web Design — FreeCodeCamp
- Front-End Developer — HackerRank
- Clean Code Practices — MHRATECH
- Git & Version Control — Satr
- React.js — Satr
- Full-Stack Developer — Project Odin
- Node.js — FreeCodeCamp

Education

Arab Open University – Egypt

Bachelor of Computer Science

Languages

- Arabic — Native
- English — Professional Working Proficiency
